

PROJECT PROFILE

McGavock Nissan uses TuffRez® for 12,000 sq ft Service Department and the Service Drive.

CUSTOMER

McGavock Nissan

Lubbock, Texas

PROJECT TEAM

Contractor: *The Floor Guys – Lubbock, TX*

PROJECT OVERVIEW

McGavock Nissan Service Center MNSC had replaced their service floor multiple times over the past several years. They were unhappy that the system was not durable enough to withstand the constant vehicular traffic of their service bays. Additionally, the floor was not resistant to chipping or chemical spills inherent in their daily work.

In order to provide a surface bond that would prevent delamination, while providing resistance to alkalis and acids, several layers of old paints and urethanes were stripped from the old floor.

KEY CONSIDERATIONS

Non-Slip: TuffRez® 238 provided a non-slip finish with good light refraction to support the high car traffic in service garage.

Strong Bond and Chemical resistance: TuffRez 201 provides an easily cleanable durable finish that withstands vehicular traffic, and resistance to fuels and hydraulic fluids.

Attractive Finish: TuffRez 238 provides an aesthetically pleasing, orange peel textured finish that diffuses light and reduces glare.

Economical: TuffRez 201 combined with the TuffRez 238 topcoat provided a low cost floor system without sacrificing the characteristics demanded by McGavock Nissan.

SYSTEM PRODUCTS

- **TuffRez® 201**
Epoxy Coating – Chemical Resistant
- **TuffRez® 238**
Epoxy Coating – Orange Peel, High Gloss, Light Refracting
