

PROJECT PROFILE

USS Midway Museum Remodels Boeing F/A-18 Hornet Ready Room Using the Exclusive PolySpec® Prestige BlackStone!

CUSTOMER

USS Midway Museum

San Diego, CA

PROJECT TEAM

General Contractor: *PolySpec Construction Services – Houston, TX*

Contractor: *Paige Floor Covering Specialists – San Diego, CA*

PROJECT OVERVIEW

The USS Midway is currently in the midst of a 10-year plan to renovate the aircraft carrier into a Naval Museum. The eight ready rooms, that were once used to brief pilots before and after tactical missions, have each been assigned a military sponsor who proudly displays memorabilia from their military past. The VFA-151 Hornet Team consisting of Northrop Grumman, Raytheon, Boeing and GE Aircraft Systems sponsors Ready Room 1.

Northrop Grumman wanted a flooring system that would be capable of withstanding over 800,000 visitors yearly. Additionally, they wanted a museum-like finish on their floor that would prominently display their unique logo. Since volunteers maintain the room, they were also in search of a system that required a low level of maintenance.

PolySpec® recommended their exclusive Prestige Collection Flooring System that provides the attractive look of marble at a fraction of the cost. The seamless epoxy floor is easy to clean while providing excellent abrasion resistance.

KEY CONSIDERATIONS

Durability: TuffRez® 236 has a polyurethane topcoat infused with 220 grit aluminum oxide that provides excellent abrasion and impact resistance to support high traffic areas.

Aesthetics: Prestige Collection provides a granite or marble appearance that showcases well in a formal setting.

SYSTEM PRODUCTS

- **IMO UltraLite®**
UltraLite Weight Epoxy Underlayment
- **Flex FR Base Coat**
Self-Leveling Epoxy Underlayment – Base Coat
- **Flex FR Color Coat**
Pigmented Epoxy Color Flake Receiving Coat
